

Why is Cosalient® EHR Easy to Use?

- **Single** screen design displays entire anesthesia record, including clinical correlations.
- **Intuitive** screen interface allows for direct entry with no cumbersome dialogue boxes.
- **Flexible** screen interface provides for multiple ways of data entry.
- **Automatic & Assisted** data entry allows for reduced workload & better patient focus.
- **Customizable** marking sets (macros) possible with initial use.
- **Seamless** transfer to PACU with no clumsy transfer mode.

Cosalient® EHR Advantages

- Learning Curve – Very short with minimal instruction.
- Data Entry – Type as clinically needed anywhere on screen.
- Anesthesia Record – Single page concise, salient document.
- Medical Billing – “Superior” for output, data quality & usability.
- IT Support – Minimal since End Users are quickly self-sufficient.
- Meet Compliance – Without disruption of clinical flow.

Cosalient®
EHR

“Most EHRs are DATA-centric: We’ve got to file every single piece of all this information those machines generate! Cosalient® EHR is PHYSICIAN-centric: What’s most important to document, how can it be done quickly and unobtrusively and how can it best be communicated? An anesthesia record is a way to give practicing anesthetist both a snapshot and detailed picture of a patient’s anesthetic course. Cosalient® EHR is the ONLY electronic record able to accomplish that.”

“Cosalient® EHR is a gem! It looks exactly like a real anesthetic record on the computer AND in print. It clearly was designed with the clinical anesthesia record in mind making it very easy to enter data, follow trends and, importantly, review later. One of its best features is that it is completely customizable for both the individual practitioner AND the type of case. That makes data entry very easy and efficient and enables me to spend more time caring for my patient. Cosalient® EHR is truly practitioner friendly.”

“Most of the time ‘EHR’ is considered a dirty word, not so with Cosalient® EHR. Cosalient® EHR is exactly what an EHR system should be: easy to use, intuitive, a clinical aid rather than hindrance, and provides an anesthetic record that is actually readable and useful for clinicians. Cosalient® EHR’s ease of use belies its underlying sophistication and additional capabilities, such as infinitely customizable individual user templates and ability to incorporate EKG tracings. I can’t imagine a more well designed, anesthetic EHR.”

Fast, Intuitive & Easy to Use

Conventional EHRs use old technology requiring you to act as both data entry operator and anesthesia provider. You are hamstrung to answer a myriad of data entry screens during the course of providing quality anesthesia care. In contrast, Cosalient® EHR uses a single screen, graphically intuitive interface that allows for fast, easy documentation. Its innovative technology reduces your data entry workload by doing all the data correlating for you. Cosalient® EHR frees you to focus on your patient and keeps you ahead of the clinical care curve.
